

Application No. 09/911,656  
Response to Office Action

Customer No. 01933

**Amendments to the Specification:**

Please amend the paragraph at page 19, lines 17-27 as follows:

If the CPU 11 confirms in step ST42 that the user has made a request to select a mail address from the recipient-address storage information, it prepares a list of mail addresses stored in the recipient-address storage area and displays it on the operation/display section 24 (step ST44). Under these circumstances, the CPU 11 accepts a mail address selected from among the mail addresses stored in the recipient-address storage area (step ST45) and copies the selected mail address to a data holding area (the abbreviated-dialing registration area) for designated abbreviated-dialing numbers (step ST46).
